NEWS!

PRESS RELEASE

17. February, 2009

PLANILUX/Gerätebau Felix Schulte GmbH presents ELTRONO, at the European Congress of Radiology, ECR in Vienna, 6-9 March 2009.

At ECR 2008, Planilux presented the most advanced radiology working environment for soft copy reading and teleradiology users. This year, Planilux has put even more strength into innovative features in order to meet customer requirements and to make the radiologists' working environment even more comfortable.

ELTRONO, presents, this year, the following developed features:

- **The Touchscreen panel** is ergonomically placed for comfortable handling. The touchscreen panel is where you monitor all ELTRONO functions in just a press of a key!
- The material in **The ergonomic mousepad** has been developed for easier handling, cleaning and comfort.
- **Flexible and appropriate lighting** is crucial for any radiology working environment. ELTRONO provides two separate light sources, which are controlled by the touchscreen panel. Both can be turned on an off together and are dimmable. The ambient back lighting and the automatic mode has been improved and provides more adjustability to provide more flexibility for the radiologist's demands.
- ELTRONO provides **individual presets as an option**. The individual working position can be saved by the user and called up at any time. The optimal ergonomic settings to which the user has adjusted the work place are then established again automatically through a memory function. A total of 16 memory locations are available. This to allow the optimal use of the work place for several users.

The patented features, the Ergo-Tilt and the Adaptive Light are still included. The important sound absorbing panel also comes as standard.

For a personal demonstration of ELTRONO, please visit us at ECR in Vienna, **Expo E, booth No 543.**

Gerätebau Felix Schulte / Planilux

Planilux has been well established in the X-ray world market for more than 50 years. Planilux is a leader in manufacturing high quality and motorized X-ray film viewers, with well known brands as Rotolux and Mammolux. Planilux has during the latest years extended the product line with designs within digital radiology. The company is based in Warstein, Germany.
